BUILDING

DETAILS

The D. L. Clark Office Building offers the finest quality equipment and state-of-the-art building systems.

■ Heating Ventilation & Air Conditioning:

Heating, cooling and fresh air is supplied to the office space by a VAV system consisting of four Mammoth-brand rooftop units providing a total of over 500 tons of cooling capacity for the Building. Two 3-million BTU gas-fired boilers are located at the rooftop penthouse to provide ample heat when required. Further distribution and individual tenant control is offered through 1,200 CFM VAV boxes or fan-powered boxes and thermostats for approximately every 1,200 SF of floor space.

Lessor shall provide heating, ventilation and air conditioning to the leased premises Monday through Friday, 8:00 a.m. to 6:00 p.m. plus Saturday, 8:00 a.m. to 1 p.m. Notifying the Lessor 48 hours in advance can turn on the Building system. The additional hours of operation would be billed to the lessee on an hourly rate of \$19.50 per unit over and above the lease rate. This hourly number is only a first-year estimated quote. The normal operation of HVAC is designed for the range of 70° to 75°.

■ Elevators:

Minimal waiting times are assured by four state-of-the-art, microprocessor-controlled, high speed traction elevators. Two freight elevators are also maintained for the convenience of the tenants. One freight elevator has a 4,000-lb. capacity; one freight elevator has a 3,000-lb. capacity.

■ Stairwells:

The building is equipped with four interior stairwells, which service all levels of the structure.
